

SERVICES OVERVIEW: ELECTRICAL CONSTRUCTION

Since beginning in 1983, our company has specialized in electrical construction services. This remains one of CH Reynolds core competencies. As customers' needs continue to evolve, our capabilities have continued to expand to meet these needs.

Today's services include:

Pre-Construction phase

Customers often require assistance to examine project costs, designs, scheduling and materials procurement in order to meet budget requirements and program objectives. Benefits include: reducing construction cycles and costs.

Design/Build

Assuming responsibility for the design and construction phases of a project is compelling to owners because it minimizes risk and accelerates project completion.

Electrical Construction

We provide skilled union electricians and personnel to deliver core and shell, tenant improvement and underground electrical services for a diverse range of customers.

Documentation

Many customers request expert assistance with as-built drawings, monitoring, verification, power quality assessments, load/site analyses and more.

Project Portfolio

CH Reynolds provides electrical construction services to a diverse range of customers, which spans from commercial real estate, healthcare, education, public institutions and industrial leaders in Northern California and beyond.

Project Highlights

Public Arts Installation: **Illuminating Downtown**

This gateway project involves the city of San Jose transforming a strategic roadway underpass in downtown San Jose into a public arts installation. It's a collaboration among artist Dan Corson, the San Jose Downtown Association, CH Reynolds and Caltrans that was completed Nov. 2015.

Industrial Mining & Manufacturing: **Lehigh Hanson Cement Plant Upgrade**

Cement mining and manufacturing is challenging work. So when Lehigh Hanson needed an upgrade involving its aging high-voltage cables and transmission substation, the company was confident in its choice of CH Reynolds for both the electrical construction expertise and the specialized safety skills and certifications.

Commercial Office Building/Campus: **Cisco Executive Briefing & Experience Center**

Cisco Executive Briefing and Experience Centers have convenient locations for interactive experiences with Cisco industry and technology experts to see how intelligent network solutions can transform organizations. CH Reynolds teamed with Devcon Construction to ensure a successful build of the company's new San Jose EBC.
