

SERVICES OVERVIEW: ENERGY MANAGEMENT

CH Reynolds provides a range of reliable and cost-effective energy management solutions. Our business recognizes that with today's rising energy costs, regulatory requirements and sustainability commitments, monitoring and optimizing energy performance is a critical business objective. We work with clients to provide baseline metering to identify energy performance metrics, offer solutions to align with client needs and provide system design and installation. Our collaborative approach gives clients the option to manage implementations in-house or rely on our expertise if desired.

Today's services include:

Energy Usage Assessment

We conduct comprehensive energy usage audits using robust metering equipment on key electrical loads, which creates a baseline energy consumption use case.

Custom Solution Design

Our team crafts customized energy management systems capable of monitoring, controlling and optimizing client's electrical loads with use of analytics from the usage audit.

Provider of Cyber Switching Solutions

Flexible, innovative and cost-effective technologies provide scalability for future expansion. It also centralizes reporting and control for simplified administration of multiple sites from a single location.

Project Portfolio

CH Reynolds provides energy management services to a diverse range of customers, spanning from property management to high tech businesses.

Project Highlights

Multiple Tenant Energy Audit: **Hudson Properties**

Hudson Properties turned to CH Reynolds for a comprehensive approach to providing updated energy billing solutions for tenants throughout its extensive CRE portfolio. The sophisticated monitoring ensures that tenants receive accurate accountings of individual energy consumption, while Hudson Properties guaranteed to recapture energy costs in a timely manner.

Energy Monitoring: **Tintri**

Tintri depends on reliable energy performance and specializes in smart storage for virtualization and private cloud. It used CH Reynolds to identify and implement a comprehensive energy monitoring solution that provides real-time visibility into what energy patterns their company needs.

Energy Monitoring: **Washington Holdings**

As a billing solution, CH Reynolds has designed power monitoring for Washington Holdings to capture energy usage on a per floor, per tenant basis.
